

REZYD-X Z67

Cleaning the toughest units just got easier!

THE INTERNAL CLEANER FOR HEAVY HYDROCARBONS

About Rezyd-X

Rezyd-X is formulated to maximize solvency properties. When used in conjunction with our other Zyme-Flow® Process compatible products, Rezyd-X offers quick penetration, dissolving and dispersing heavy hydrocarbon sludges, asphalt, heavy lube oils and heavy residues in vessels, heat exchangers, process lines and tanks.

Emulsions made with Rezyd-X will break without additional clean-water recovery chemicals and wash solutions can be sent to crude storage or API separators for easy breakout and recovery.

Benefits

Flexibility

Rezyd-X offers flexibility and safety. It can either be used in internal circulations or in on-line treatments. Can also be used in conjunction with other ZymeFlow products.

Time Efficient

Rezyd-X is an internal cleaner that dissolves heavy hydrocarbon deposits and polymeric deposits on contact!

Low Hazard

Rezyd-X does not contribute to VOC's. It is a non-petroleum product that has dramatically lower toxicity and flammability than comparable petroleum and citrus/terpene-based products.

REZYD-X Z67

THE INTERNAL CLEANER FOR HEAVY HYDROCARBONS

At A Glance

Process Units and Vessels

- Crude Units
- Vacuum Units
- Desalters
- Flare Knock Out Drums
- Heat Exchangers
- Process Lines & Tanks

Removes Contaminants

Removes a broad range of contaminants including:

- Thick sludge
- Heavy deposits
- Asphalts
- Residues
- Sulfides
- Polythionates
- Thiosulfates

Application Methods

Boilout or Cascade using
water as a carrier

CHEMICAL CORNER

100% Biodegradable

Wastewater Friendly

Safe & Effective
