

ULTRAZYME BT

FASTER, CLEANER, GREENER

Powerful UltraSonic Cleaning

About UltraZyme BT

UltraZyme BT is a solvent and surfactant blend specifically designed for use in ultrasonic baths, but is also effective in circulation type applications as well. It is a concentrated chemistry highly effective at removing foulants such as residual oil, greases, asphaltenes and more. A beneficial feature of UltraZyme BT is that it is fully customizable to the unique cleaning process being utilized. UltraZyme BT has a higher solvency than other similar products available on the market, which shortens cleaning timelines and reduces or eliminates the amount of manual cleaning necessary. It also has the benefit of increased capacity for HC dissolution, further saving time and costs, all while delivering like new results.

At A Glance

Benefits

- Shortened cleaning timeline
- Increased longevity of assets
- Safe chemistry for personnel
- Filter safe
- Longer bath life

Proprietary Chemistry

- Higher solvency
- Solvent/surfactant blend
- Low foaming

CHEMICAL CORNER

- *Concentrated formula*
- *Non-exothermic*
- *Customizable to different set ups & processes*
- *Reduce or eliminate mechanical blasting*

Effective & Safe
