

ULTRAZYME FP

Highly Effective Surface Cleaning

FASTER, CLEANER, GREENER

About UltraZyme FP

UltraZyme FP is a powerful surface cleaner, comprised of a surfactant/oxidizer mixed with a water soluble solvent. It is extremely effective at de-oiling and removing hydrocarbons and contaminants, while at the same time is biodegradable. This versatile cleaner can be a pre-treatment for pressure cleaning or a post-treatment with other cleaning methods. What does all of this mean to you? Cleaner equipment, no chemical waste to dispose of, and one of the safest chemistries in the world to handle.

UltraZyme FP is a surfactant and solvent package that simultaneously de-oils, removes baked on heavy deposits and asphaltenes, leaving equipment cleaner and extending asset longevity.

Benefits

Flexibility

Can be utilized as either a pre or post-treatment, depending on cleaning processes. No special equipment required.

Effective

UltraZyme FP removes common contaminants and breaks down stubborn hydrocarbons and residual oils almost instantly.

Low Hazard

UltraZyme FP is low toxicity, biodegradable, safe for personnel, equipment, and the environment. Neutralizes residual H₂S, increasing safety.

ULTRAZYME FP

FASTER, CLEANER, GREENER

Steam Cleaning Only

Steam Cleaning After UltraZyme FP Treatment

At A Glance

Benefits

- Shortened cleaning timeline
- Increased longevity of assets
- Safe & powerful chemistry
- Better end results
- Versatile application

Proprietary Chemistry

- Removes oils & asphaltenes easily
- Surfactant/solvent blend
- Environmentally safe

CHEMICAL CORNER

- *Powerful cleaning made easy*
- *Biodegradable*
- *Contains EPD Certified components*
- *Removes hydrocarbons, reducing corrosion & neutralizing H₂S*

Effective & Safe
